

MELLING TOOL COMPANY SUPPLIER QUALITY MANUAL

Supply Chain Vision Statement

Continually working to streamline communication using current and new technologies throughout all levels of the Supply Chain by facilitating continuous improvement and provide increased customer and supplier satisfaction.

Changes / Updates / Highlights

Section Number	Title	Description/Highlighted	Date Revised
Abbreviations	ISO References	Changed from ISOTS to IATF	1/23/2017
1.B.4	Quality Performance Requirements	Added Zero Plant Disruption or Special Statuses.	1/23/2017
2.A.1	ISO References	Latest Version Added to Sentence	1/23/2017
2.A.1.d	Transitioning from ISOTS to IATF	MTC and MII will accept IATF Rules and Requirements	1/23/2017
2.B.3.a	Annual Onsite Audits	Added Requirement due to Changes in Customer Specifics assigned to MTC or MII	1/23/2017
2.B.4.c	Supplier Quality Manual	The Manual will be sent to Suppliers Annually	1/23/2017
2.C.2.a	Annual Recertification	Changed Requirement from Layout to PPAP	1/23/2017
2.E.1	Sub-Supplier Control	Added min. pass down requirements found in this manual	1/23/2017
2.G.1.a	Capability and Control	Ongoing Capability changed from Cp & Cpk to Xp and Xpk.	1/23/2017
2.I.1	Shelf Life	Changed requirement from 120 Business Days to a min. of 6 Months	1/23/2017
4.E.1	Legal & Other Requirements	Added Prop 65, Asbestos to materials statement.	1/23/2017
11	Key Contacts	Added Dan W., Harold B., Mike P.	1/23/2017
11	Key Contacts	Added Jodie N. and Nancy K.	8/02/2017
11	Key Contacts	Updated to new contact numbers	10/20/17
4.G	Code of Conduct	Added code of conduct	10/20/17
2.A.5	Quality Systems Requirements	Added VDA requirements for MII Suppliers	10/20/17
2.B.3	Requirements for Supplier Approval	Revised audit information to include timing requirements based on CSRs and use of second party audit companies.	10/20/17

SUPPLIER MANUAL OUTLINE

1. General Information
 - A. Objective
 - B. Supplier Requirements
2. Quality Systems Requirements
 - A. Quality Management System Requirements
 - B. Requirements for Supplier Approval
 1. Purchasing Contract
 2. Supplier Quality System Self-Assessment
 3. On-Site Quality Assessment
 4. Acknowledgment of Supplier Manual Supplier Manual
 - C. Customer-Specific Requirements
 1. Statement of requirements
 2. Annual Recertification
 - D. Advanced Product Quality Planning (APQP)
 1. APQP Requirements
 2. APQP supplier kick-off meeting
 - E. Tier2/Sub-Supplier Control

- F. Manufacturing Process and PPAP requirements
 - 1. Prototype/pre-production Parts
 - 2. Production Part Approval Process (PPAP)
 - 3. Capacity Verification/Run at Rate
- G. Process Capability and Control Requirements
- H. Cleanliness Requirements
- I. Shelf Life Requirements
- J. Supplier Material Traceability /Lot Control
- K. Certificate of Conformance
- L. Notification of Customer Rejects/ Corrective Action Reports
- M. Supplier Charge back Policy
- N. Continuous Improvement
 - 1. General
 - 2. Expectations-Annual Improvement Factor
- O. Record Retention
- 3. Product or Process Changes and Deviations
 - A. Engineering/Process Change notification
 - B. Request for Change by Supplier
 - C. Request for Change by MTC or MII
- 4. Environmental and Safety Management System
 - A. Environmental Management Systems Requirements
 - B. MTC and MII Environmental Policy/Guidelines and Survey
 - C. International Materials Data System (IMDS)
 - D. Safety Data Sheets (MSDS)
 - E. Legal and Governmental Requirements
 - F. Conflict Mineral Requirements
 - G. Code of Conduct
- 5. Shipping
 - A. Delivery performance
 - B. Packaging /Label Specifications
 - C. Packing slips and Bills of Lading
 - D. Contingency Plan
- 6. Materials Management
 - A. Purchase Orders
 - B. Ship Schedules
- 7. Obsolescence Claims
- 8. Cost Savings
- 9. Supplier Price Increases
- 10. Supporting Documentation
- 11. MTC and MII Key Contacts

Appendices

Appendix A – Acknowledgement Form

Appendix B – Supplier Contacts Form

Abbreviations

MTC – Melling Tool Company

MEP – Melling Engine Parts

MII – Melling Industries

PPAP – Production Part Approval Process

8D – Corrective/Preventive Action format using 8 disciplines for problem solving.

PQC – Product Quality Characteristic.

SOR – Statement of Requirements

ISO 9001 or **IATF 16949** – An input document for the development of a quality manual.

ISO 9001 and **IATF 16949** – Copyright protected property of the International Organization for Standardization, Geneva, Switzerland.

ISO 9001 / 16949 – prepared by the International Automotive Task Force (IATC) and Japan Automobile Manufacturers Association, Inc. (JAMA), with support from ISO/TC, quality management and quality assurance.

1. GENERAL INFORMATION

A. Objective

To communicate the Melling Tool Company (*hereafter referred to as MTC*) and Melling Industries, Inc. (*hereafter referred to as MII*) expectations regarding quality and environmental management systems to companies providing products and services to MTC and MII.

To ensure that Supplier quality and environmental systems conform to MTC and/or MII systems requirements. (*Per section 1.B, Supplier Requirements*)

Melling Tool Company (MTC) is the parent company of Melling Industries, Inc. (*hereafter referred to as MII*) and Melling Engine Parts (*hereafter referred to as MEP*), the name we use to market products. All requirements in this manual apply to products and/or services under all above business names.

B. Supplier Requirements

1. All sections of this manual shall be read and understood. Any exceptions to this manual must be submitted to MTC Purchasing or MII Procurement Manager.
2. This manual is an extension of MTC and MII Purchase Orders and SOR's. All requirements in this manual shall be considered terms & conditions of sale.
3. Supplier delivery performance requirement shall be **100%** on time.
4. Supplier quality performance requirement shall be “**ZERO DEFECTS, Plant Disruptions or Special Statuses i.e. CS1, CS2 etc.**”
5. All suppliers shall follow MTC's and/or MII's Quality System requirements as defined by this manual.
6. Corrective action initial response shall be within two (2) days of occurrence. Root cause analysis and corrective action plan shall follow within thirty (30) days or per requirements.
7. MTC and MII have a Supplier Charge back policy and Charge back form. Suppliers shall be cost accountable per that policy and chargeback form. All charge backs to be worked through and negotiated with Supplier throughout the corrective action process.
8. Conformance to our Supplier Performance Rating System which shall be distributed at least annually.
9. Familiarize yourself to MMOG/LE requirements and strive to implement systems to be compliant or certified to MMOG/LE.

2. Quality Systems Requirements

A. MTC and MII Supplier Quality Systems Requirement

1. ISO 9001(latest version) is the preferred certification (minimum) with a long term goal of achieving ISO/IATF 16949 (latest version) certification or a Quality System per MTC and/or MII requirements

and agreement. An implementation plan should be submitted to the Purchasing Department within a reasonable amount of time of the receipt of this manual, if third-party certification has not already been achieved.

- a. The Supplier shall provide MTC and/or MII with a copy of their certificate, if applicable.
 - b. The Supplier shall provide MTC and/or MII with a new certificate from re-certification audits, if applicable.
 - c. The Supplier must notify MTC and/or MII if there is a change in certification status, if applicable.
 - d. Transitioning from ISOTS and previous revision of ISO 9001 MTC and/or MII will accept the IATF Rules and Requirements including timing requirements for MTC and/or MII Suppliers.
2. If your company, or any of the lower tier suppliers, use any of these special processes to produce products that are supplied to MTC and/or MII you are required to complete an annual assessment based on the current revision of the AIAG CQI standards. Send your completed assessment forms each year to MTC and/or MII Purchasing. Forms can be found at this link: <http://www.aiag.org/>
- Heat Treating – CQI-9 Special Process: Heat Treat System Assessment
 - Plating – CQI-11 Special Process: Plating System Assessment
 - Coating – CQI-12 Special Process: Coating System Assessment
 - Welding – CQI-15 Special Process: Welding System Assessment
 - Soldering – CQI-17 Special Process: Soldering System Assessment
 - Molding – CQI-23 Special Process: Molding System Assessment
3. The supplier should be familiar and use systems that are similar to systems outlined in the current AIAG CQI standards for:
- Warranty Analysis – CQI-14
 - Layered Process Audits – CQI-8
4. MTC and/or MII follows the BIQs guidelines. You should be aware and utilize the systems outlined in the current BIQs documents published by GM.
5. For MII suppliers only the supplier should be familiar with the requirements of the current version of the VDA 6.3 guidelines. You should be aware and utilize the system process requirements.

B. Requirements for Supplier Approval

1. Purchasing Contact
 - a. MTC and/or MII Supplier Approval shall begin with the Purchasing Department's assessment of any mutual business opportunities.
2. Supplier Quality System Self-Assessment
 - a. Complete the Supplier Quality System Self-Assessment form and forward a copy to the MTC and/or MII Purchasing Department.
3. An Onsite Quality System assessment by an MTC and/or MII representative(s) may be required prior to issuance of initial or new purchasing agreements.
 - a. Due to revised customer specifics MTC and/or MII reserves the right to do onsite audits for qualifying suppliers annually based on the number of supplier employees used to produce parts for MTC and/or MII OEM, Customer requirements, and/or the Supplier performance.
 - b. Audits may be completed by a MTC or MII employee or it may be completed by a second party audit team on behalf of MTC and/or MII
4. Acknowledgment of Supplier Quality Manual –

- a. The Supplier Quality Manual shall be read and understood. The supplier shall sign the Supplier Manual Acknowledgement form (*Appendix A*) and submit a copy with a Supplier Key Contact List (*Appendix B*) to the MTC and/or MII Purchasing and/or MTC and/or MII Quality Department.
- b. Failure to sign the Supplier Manual Acknowledgement form shall not absolve the supplier of its terms and conditions.
- c. The Supplier Manual will be sent to MTC and/or MII suppliers annually to communicate changes to MTC and/or MII requirements. Response to this request will be within 5 business days.

C. Customer Specific Requirements

1. Statement of Requirements (SOR)
 - a. MTC and/or MII Purchasing Department may submit a Statement of Requirements (SOR) with the quote package defining and communicating part specific or program requirements over and above print specifications.
 - b. MTC and/or MII specific requirements which are more stringent than the OEM requirements will supersede those OEM requirements.
2. Annual Recertification – (PPAP)
 - a. Annual Part re-certification is required per MTC and/or MII customer requirements. PPAP level will be communicated when required.

D. Advanced Product Quality Planning (APQP)

1. APQP Requirements
 - a. Suppliers shall have a fully implemented APQP process and review it with the MTC and/or MII Supplier Quality Department based on component complexity and criticality.
2. APQP Supplier Kick-Off Meeting
 - a. An APQP Supplier Kick-off meeting may be required prior to Purchase contract issuance. The purpose shall be to define the project's technical, quality, manufacturing, packaging, delivery, and business issues.

E. Sub-Supplier Control

1. Suppliers shall be responsible for control and improvement activities of sub-suppliers. MTC and/or MII suppliers shall require sub-suppliers of product to operate within a comprehensive quality management system. Minimum pass down requirements are found in this manual.

F. Manufacturing Process and PPAP Requirements

1. Prototype/Pre-production Parts – May be produced on Non-Production tooling but specific requirements will be spelled out on the MTC and/or MII Purchase Order.
2. Production Part Approval Process (PPAP) per the current revisions of the AIAG PPAP Manual
3. Production parts must be manufactured on production equipment and PPAP approved prior to shipment. A Level 3 PPAP is the default level of submission. The submission must contain a PPAP Submission Checklist defining all deliverables. See MTC and/or MII website for checklist.
4. Capacity Verification/Run at Rate
 - a. If requested, suppliers shall provide documentation to MTC and/or MII substantiating sufficient resources to provide products as quoted.

G. Process Capability and Control Requirements:

1. Significant Characteristics and/or dimensions listed as PQC's (Product Quality Characteristic);
 - a. Inspection requirements for these dimensions will be agreed upon by MTC and/or MII. PQC's will be communicated to the supplier as applicable. (See Figure 1)

Quality Indices Acceptance Criteria Table for "PQC" and Significant Product Characteristics:

Characteristic	PPAP Requirement	Ongoing Production Numbers Minimum Capability Requirements
PQC	Xp → 1.67 Xpk → 1.67	Xp → 1.33 Xpk → 1.33
Significant Product Characteristics	Samples Checked to Design Record	Noted on control plan and monitored during production

Figure 1.

H. Cleanliness Requirements

1. MTC and/or MII requires that all material received shall be clean and free of debris, residual abrasive material, burrs, and corrosive products adversely affecting fit, function, or appearance. Additional requirements may be required per engineering specifications, drawings, PO requirements, and/or SOR.

I. Shelf life Requirements

1. All material/received shall be free of rust for 6 months minimum, after receipt.

J. Supplier Material Traceability/Lot Control

1. Suppliers shall be able to demonstrate adequate product traceability and provide a detailed explanation or example of the system.

K. Certificate of Conformance

1. MTC and/or MII may require, as necessary, a Certificate of Conformance form with each shipment certifying the product meets all material and drawing specifications. The supplier form may be used with applicable information. The supplier shall, at a minimum, retain appropriate test data.

L. Notification of Customer Rejects/Corrective Action Reports

1. In the event of a rejection, the supplier shall be notified and a CAR may be given. Depending on the severity, a supplier representative may be required to visit MTC and/or MII immediately to address the issue.
2. The supplier shall be responsible for an initial response within two (2) days with containment. Short term actions with root cause using a 5 Why to determine root cause. Supplier must complete a corrective action closure within thirty (30) days, or as noted on the CAR including verification for corrective measures taken.
3. The minimum initial response shall consist of the immediate supplier action and containment plan.

4. RMA for rejected part will be requested and if an RMA is not provided within a week (5 business days) the parts will be returned to the supplier at your expense.
5. Information required to address a corrective action report (8D) includes:
 - a. Problem Definition
 - b. Emergency Response
 - c. Root Cause (must use a systemic problem tool such as a 3 tiered 5 Why)
 - d. Containment Action
 - e. Interim Corrective Action
 - f. Long-term Corrective Action (prevent and detect issue)
 - g. Long-term Corrective Action Verification
 - h. Additional supporting documentation and problem solving tools as requested; i.e 5why's, Cause & Effect diagram, PFMEA, control plan, work instruction, training records, etc...
6. A copy of the corrective action report shall be submitted to MTC and/or MII Quality Department.
7. DPPM's and CAR's will be reflected in your supplier rating.
 - a. Each supplier is required to manage their own DPPM rating. If the quantity of suspect material returned to the supplier contains conforming parts, the supplier is encouraged to submit a PPM Reversal Request to the Quality contact at MTC and/or MII so that accurate records can be kept as to the number of non-conforming parts sent to MTC and/or MII. The PPM Reversal Request form can be found on the MTC and/or MII website.
 - b. Once a sort of returned suspect material is complete and the supplier wishes to reship the portion of conforming parts back to MTC and/or MII the can be done if the following conditions are fulfilled:
 - i. There is an open order with requirements to ship against
 - ii. The lot of conforming parts are marked as verified and noted with the method listed on the container
8. All charges incurred as a result of a supplier non-conformance are the responsibility of the supplier.
9. Supplier is required to replace all non-conforming parts per MTC and/or MII request in a timely manner.
10. MTC and/or MII has a non-conformance Supplier Chargeback Policy explaining all associated costs.
11. Training materials for the 3 tiered 5 why problem solving tool is located on the MTC and/or MII Website.

M. Supplier Charge Back Policy

1. The Supplier accepts financial responsibility for non-conforming product including costs incurred for containment, sorting, premium freight, rework, repair, and replacement of defective material, resulting overtime, and production loss incurred by MTC and/or MII or by our Customers.
 - a. The following is a schedule for typical charge back cost categories associated with nonconforming product sent to MTC and/or MII:
 - i. Administrative fees for each CAR issued. Late responses to corrective action requests will also be subject to administrative fees.
 - ii. All hourly fees as noted on the Supplier Chargeback form are subject to MTC's and/or MII's standard overtime rules.

- iii. All freight for product return or replacement due to vendor related defect, including MTC and/or MII required expediting will be the responsibility of the supplier.
 - iv. Off-site 3rd Party Sorting—charges to be paid directly to 3rd Party Sorting Company by the Supplier.
 - v. In-house sorting by 3rd Party Sorting Company— charges to be paid directly to 3rd Party Sorting Company by the Supplier.
 - vi. If In-house sorting by MTC and/or MII personnel is required, the Supplier will be responsible for actual costs incurred.
 - vii. Production line down charge—Supplier will be responsible for actual costs incurred.
 - viii. For miscellaneous fees (rework, material handling, required Customer time and travel costs, expedites, Customer location sorting fees, tooling/machine damage, testing, etc.) Supplier will be responsible for actual costs incurred.
 - ix. Supplier shall be responsible for all applicable warranty costs due to supplier related defect.
 - x. All fees will be discussed with the supplier prior to the issuance of the chargeback form and some fees may be waved at the discretion of MTC and/or MII Quality or Purchasing/Procurement.
- b. All costs will be charged back via MTC and/or MII Corrective Action Form or MTC and/or MII Supplier Chargeback Form.

N. Continuous Improvement

1. General

- a. Continuous Improvement regarding cost reduction is an essential element of long-term business success for MTC and/or MII and its Suppliers. In order to remain competitive, MTC and/or MII and its Suppliers recognize the requirement to eliminate waste and reduce the cost of products.

2. Expectation—Annual Improvement Factor

- a. MTC and/or MII expects all Suppliers to demonstrate a year-over-year cost reduction of at least 2%. We expect this to be directly reflected in the form of an Annual Improvement Factor (AIF) on all business.
- b. All Suppliers are expected to constantly examine and optimize the entire cost structure of their business and products supplied to MTC and/or MII. This includes process improvements, design improvements, transportation, reductions in cycle-time, scrap, die/tooling set-up, Sales, General and Administration (SG&A), fixed and variable overhead, etc. In order to ensure proper review and validation of Suppliers' design and process improvement ideas, Suppliers must strictly comply with MTC's and/or MII's change management requirements for all design and process change proposals.

O. Record Retention

- 1. Suppliers are required to maintain, at minimum, Production Part Approval Process (PPAP) packages, annual layout and validation records, tooling records, traceability records, engineering records, Purchase contracts and amendments for the length of time that the part (or part family) is active for production and service requirements plus (3) three calendar years or a minimum of 10 years whichever is longer, unless otherwise specified by MTC and/or MII. Corrective Action records and Quality performance records, such as control charts, inspection and test results are to be retained for 5 years minimum.

2. Retention times shall meet or exceed the above requirements and any governmental requirements.

3. Product or Process Changes and Deviations

A. Engineering/Process Change Notification

1. Changes must be submitted and approved prior to implementation. Any change to a supplier product, process or any of its characteristics is considered an Engineering change, whether that characteristic was specified in the product specification or not. The supplier shall submit a Supplier Deviation Request to MTC and/or MII Purchasing Department representative or Procurement Manager for processing.

B. Request for Change by Supplier

1. If requesting a change, the supplier will be responsible for all associated expenses, including expenses that may be incurred downstream. MTC and/or MII will not participate in any associated price increases.
 - a. In an effort to foster continuous improvement activities within our supply base, MTC and/or MII will share the cost savings on supplier initiated design and process improvements.
2. MTC and/or MII will not accept Supplier cost increases due to an engineering change unless authorized and approved by MTC and/or MII.
3. Any supplier requesting a product move to a different facility must submit a Supplier Deviation Request form to the MTC and/or MII Purchasing representatives and submit a new PPAP for the respective products/services.

C. Request for Change by MTC and/or MII

1. If MTC and/or MII requires changes resulting in a price reduction in either tooling or manufacturing costs, MTC and/or MII will expect component price to reflect the entire amount reduced.

4. Environmental and Safety Management Systems

A. Environmental Management Systems Requirements

1. MTC and/or MII expects suppliers to work towards achieving compliance to the latest ISO14001 Environmental Management System standard. An implementation plan should be submitted to the Purchasing Department within a reasonable amount of time of the receipt of this manual, if third-party certification has not already been achieved.
2. MTC and/or MII is required per our ISO 14001 to require all suppliers to submit copies of certifications and proof of liability insurance. This should be sent to MTC and/or MII Purchasing upon renewal or at a minimum 1 time per year.

B. MTC and/or MII Environmental Policy/Guidelines and Survey

1. MTC and/or MII suppliers and service providers will be required to follow the Environmental and Safety guidelines as noted in the MTC and/or MII Visitors and Contractors handbook. Reference MTC and/or MII website or contact MTC Purchasing and/or MII Procurement for a copy if not provided one during a visit to MTC.
2. MTC and/or MII suppliers and service providers are required to complete the Environmental Supplier Survey and return to MTC Purchasing and/or MII Procurement.

C. International Materials Data System (IMDS)

1. **IMDS** tracks chemical ingredients of parts and assemblies across the entire automotive OEM supply chain. The supplier may be required to input materials data (<http://www.mdssystem.com>). This requirement will be communicated in the quote package and/or SOR. MTC's IMDS ID is 34791. MII's IMDS ID is 34791.

D. Safety Data Sheets (SDS / MSDS)

1. All chemicals brought onto MTC and/or MII property require a SDS Sheet (MSDS). The SDS must be provided to the Environmental Management Representative (EMR) for review prior to bringing the chemical on site.

E. Legal and Governmental Requirements

1. All materials used in, or incorporated into MTC and/or MII products shall comply with current legal, governmental and safety constraints on restricted, toxic, and hazardous materials such as REACH, RoHS, California Prop. 65 and Asbestos declarations. Hazardous materials must comply with OSHA standards and be properly identified.

F. Conflict Mineral requirements (For Component Suppliers)

1. To make reasonable efforts:
 - a. to disclose to Melling, the sources of Conflict Minerals used in its products; and
 - b. to eliminate procurement, as soon as commercially practicable, of products containing Conflict Minerals obtained from sources that fund or support inhumane treatment in the Covered Countries. (Refer to Melling Engine Parts Guideline for Conflict Mineral Reporting)
2. To assist Melling to comply with the disclosure requirements of Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, and the rules of the U.S. Securities and Exchange Commission promulgated pursuant to that law, as well as any related laws and rules.
3. We expect that you will fulfill your reporting obligations which require our supplier partners to undertake the following actions, which are similar to those of other automotive and cross-industry manufacturing companies:
 - a. Send contact information for a designated conflict minerals representative for your Company to Melling Purchasing, this will be your acknowledgement of these requirements.
 - b. Investigate & Report the required company –level data and, if known, the smelter data, for all uses of the designated minerals and derivatives in the Conflict Mineral Reporting template for any materials, components or products supplied to Melling. Return a completed Conflict Minerals Reporting Template www.conflictreesmelter.org including all smelter information for all of the designated minerals (see reference materials for Conflict Mineral Reporting template information and guidance).
 - c. Please remember to Document all steps taken to collect and report conflict minerals information and preserve that documentation.

G. Code of conduct policy

1. The company expects all of its visitors and/or contractors to conduct themselves in an ethical manner when performing their duties for or on behalf of MTC and MII. Melling has an employee code of ethical conduct policy that prohibits employees from accepting gifts above the value of \$100.00 without the approval of a supervisor. We expect all of our employees and visitors to maintain all company information as confidential.
2. Suppliers will be sent the full code of conduct annually and are required to reference the full code of conduct on the MTC website.

5. Shipping

A. Delivery Performance

1. Delivery performance will be shown in our Supplier Performance Rating System. Supplier awareness of this requirement is important. It is a key performance metric.
2. Delivery requirements will be on the purchase order.
3. All suppliers shall deliver on time 100% to all of our locations.

4. All products shall be shipped to meet the due date at the MTC and/or MII location.
5. Early or late deliveries shall not be tolerated without penalty (i.e. supplier rating) unless MTC and/or MII has approved them.
6. Over and under shipment needs prior approval by MTC Purchasing and/or MII Procurement.
 - a. Purchase order:
 - i. Components; Total quantity of components received must be within plus two to minus zero percent of the purchase order quantity.
 - ii. Castings; Total quantity of casting received must be within plus/minus ten percent of the purchase order quantity.
7. Any count discrepancies will be communicated to the supplier immediately.

B. Packaging/Label Specification

1. All products shipped to MTC and/or MII shall be properly packaged to assure that they arrive at MTC and/or MII in good condition. All packaging must be pre-approved prior to shipping through the MTC and/or MII
2. Packaging Data Sheet.
3. Standardized pallets / skids – 36”X 39” (4 way).
4. For components received in boxes there is a maximum weight of 40lbs.
5. All material must be properly identified with the following information on a readable bar code label using the standard AIAG format unless otherwise approved by MTC and/or MII. All container labels must contain the following (6) six fields. (*See Figure 2a*)
 - a. From (Supplier Name)
 - b. To (MTC or MII Location)
 - c. Part Number Field:
 - I. Part # Text = 0.05 inch high in the upper left hand corner of the field over identifier (P).
 - II. Melling Part # Text = 0.5 inch high and 0.25 inch wide. Must be as per P.O.
 - III. Part Bar Code = Code 39 bar code part number = 0.5 inch high.
 - d. Quantity Field:
 - I. Quantity# Text = .05 inch high in the upper left hand corner of the field over identifier (Q)
 - II. Quantity Text = Total quantity per container = 0.5 inch high and 0.25 inch wide.
 - III. Quantity Bar Code = Code 39 bar code identifier (Q) and the quantity = 0.5 inch high.
 - e. Supplier Lot Number must be able to be manually read and also be read by a scanner. No prefix is required.
 - f. P.O.# Field
 - I. P.O.# Text = .05 inch high in the upper left hand corner of the field over identifier (K)
 - II. P.O. # Text = .3125 inch high .125 inch wide.
 - III. P.O. # Bar Code = Code 39 bar code identifier (K) and the P.O. number. 0.5 inch high
 - g. Date Field. Optional
 - h. Master Pack Labels (*Figure 2b*) are required on pallets with two or more containers of the same part and require the same five fields as container labels. The quantity (*Field d*) will be the total quantity per lot number and must be clearly visible. If more than one lot number is sent on a pallet, there needs to be one master label per supplier lot number.
6. Any deviations from these requirements require formal MTC and/or MII approval.
7. Any concerns if labels meet requirements contact MTC and/or MII Quality Engineer.

C. Packing Slips and Bills of Lading

1. All packing slips and bills of lading must have the following information
 - a. Sold to Address
 - b. Ship to Address
 - c. Purchase Order number for each item shipped
 - d. Packing slip number
 - e. Each item number shipped with description
 - f. Quantity shipped
 - g. Number of boxes /cartons or containers shipped
 - h. Date of shipment
 - i. Shipping Class. Use the shipping class on MTC and/or MII Purchase Order if indicated.
 - j. BOL # and Pro # if applicable
 - k. For both MTC and MII 3rd Party bill information must appear on the BOL.
Melling Tool Co.
Advance Freight Traffic Service
P.O. Box 183850
Shelby Township, MI. 48318-3850

D. Contingency Plan

1. The Supplier shall have a contingency plan to ensure continuation of supply and 100% on time delivery in case of equipment failure, labor shortage or utility interruption and available for review by MTC and/or MII.

6. Materials Management

A. Purchase Orders

1. Purchase orders are issued to suppliers on MTC and/or MII approved supplier list.
2. MTC and/or MII Purchase Orders or Requests for Quote or other documentation shall be proprietary and confidential unless agreed to in writing from MTC's Purchasing Department and/or MII's Procurement Manager.
3. All suppliers must comply with all requirements, all terms, and all conditions of the purchase order and as noted on the MTC and/or MII website.
4. Any special additional requirements beyond the standard shall be stated in the body of the purchase order and/or as noted in the Statement of Requirements.
5. SDS shall be submitted, as needed and/or required, on products prior to shipping.
6. All products shipped for production must first have PPAP approval, unless the Supplier has obtained an approved deviation from MTC and/or MII.
7. A Purchase Order Acknowledgment is returned with every purchase order. The supplier is required to have their applicable representative review and acknowledge via email to the MTC Purchasing agent and/or MII Procurement Manager.
8. Failure to submit an acknowledgment does not absolve the supplier from the purchase order terms or conditions. Shipment of product to MTC and/or MII is deemed as an acceptance to all terms and conditions of the purchase order and any other contractual agreements.
 - i. All deviations from purchase order requirements must be communicated to the MTC Purchasing Department and/or MII Procurement Manager.

B. Ship Schedules

1. The required delivery dates shall be on the purchase order.

2. The supplier shall be responsible for shipment transit time to meet the due date on the Purchase order. A separate daily/weekly ship schedule may need to be generated based on our production run schedule. The MTC purchasing agent and/or MII Procurement Manager shall contact the supplier to coordinate and confirm acceptance of the schedule.

7. Obsolescence Claims

1. MTC and/or MII will notify Suppliers when a program end/change has been announced and will use a standard authorization of 4 weeks firm FG and 4 additional weeks of material.
2. It shall be the responsibility of the supplier to control raw materials and reduce any possible obsolescence exposure to MTC and/or MII.
3. All obsolescence claims should be filed within two weeks of program end/change notification date.
4. MTC and/or MII may review all claims and verify obsolescence before acceptance of claim.
5. The supplier's claim form must be itemized, showing MTC and/or MII item numbers, quantities, weights, and at which stage each item has been processed.

8. Cost Savings

- A. To foster continuous improvement activities within our supply base, MTC and/or MII shall share the cost savings on supplier initiated design and process improvements.
- B. Productivity costs savings with yearly givebacks will be negotiated

9. Supplier Price Increases

- A. If a Supplier price increase should become necessary, the following shall be required.
 1. A complete product cost break down with itemized price changes and reasons, and pre and post change invoices.
 2. A minimum 2 month notification on increase prior to effective date of proposed increase.
 3. MTC and/or MII approval is required prior to any price increases.

10. Supporting Documentation

- A. Contact your MTC Purchasing and/or MII Procurement or Quality department to obtain electronic copies of the forms referenced in this manual or will be added to the MTC and/or MII website for download in the future.
