Quality

As an OEM water pump manufacturer, Melling uses OE approved quality components. Some of these components include “Best in Class” low friction self-lubricating seals as well as TS16949/ISO9001 premium double lip bearing seals with premium OEM grade grease and fill. As a final step in our assembly process, all Melling water pumps are leak tested to ensure OEM or better dependability.

Coverage

Melling offers product coverage for domestic cars and trucks. All products are available from our Jackson, MI distribution center.

Product offering is focused on families of engines. Melling brand water pumps come with a 36 month or 50,000 mile warranty.

Service & Support

Melling has both an ASE Certified team to handle technical calls and warranty questions, as well as ACES and PIES compliant award winning catalog data.

Packaging

Melling is committed to “Quality in all we do!” Handling damage is a commonly encountered issue to the pump gaskets, O-rings or other soft components necessary for proper assembly. Melling packaging provides excellent protection for the water pump and its components.

Etched Product Identifier

Each Melling water pump is uniquely laser etched to identify it as a Melling manufactured part. In this way you can be assured you have a quality Melling replacement water pump.

AN ADVANTAGE BY DESIGN

Since 1946, when George Melling Sr. and his son Ben introduced their first oil pump, the M-10, the Melling brand has been recognized as the industry standard in fluid delivery technologies.

After 75 years in business, demand for our products is stronger than ever. In fact, Melling oil pumps engineered and manufactured in Michigan are now widely preferred by professionals around the world.

From the first product shipped three generations ago to our now extensive portfolio of world-class automotive solutions, Melling has given customers multiple reasons to prefer one brand and one standard of quality and performance.

Melling Engine Parts are designed and manufactured with key advantages; each is backed by resources, technologies and people who are the very best in the world. In addition to designing and building exceptional products, Melling specializes in fulfilling the daily needs of our customers by providing consistently high order fill.

Melling is also a world-class manufacturer of original equipment (OE) automotive water pumps, producing over three quarter of a million OEM water pumps each year. Melling's OE customers require advanced R&D testing capabilities to develop and validate new water pump designs. Those projects expand our manufacturing capabilities and processes while adhering to stringent quality and cleanliness requirements. One of the newest OE water pumps is for GM's LT2 engine, used in the new Corvette Stingray (pictured). The lessons learned in our OE programs are continually applied to our line of aftermarket water pumps, ensuring OEM grade water pumps for the aftermarket.

In closing, we want to thank all our loyal aftermarket customers!
